EDGE CONDITIONING MILL DESTINED FOR MEXICO

Tishken Products of Cleveland, Ohio, a member of the Formtek Group, has recently supplied an STR40 Edge Conditioning System for the steel service center industry to utilize drop cuts and narrow mullets into saleable products. The **Tishken STR40 System** can condition the strip edge on material up to 4" wide by 1/4" thick and as small as 0.060" x 0.50". At speeds up to 250 FPM, the system economically produces edge conditioned, straightened, and cut to length product. The versatility of this edge conditioning system, recently updated with new drivetrain and digital line controls with batch production capabilities, decreases changeover time and increases net production capability. For more information, please contact sales@formtekcleland.com, or direct at (216) 292-6300. Or visit us on the web at www.tishken.com.
